

COMPUTER SCIENCE STUDENT

Nthabeleng Khabele

PROFILE

I am a very headstrong, dedicated, and confident individual, who is always willing to learn something new. I have been deputy chairlady and class representative in high school and so I love being part of the disciplines. I could confidently say that my leadership skills are quite impressive. I am able to work well within a team, even under significant pressure. I value other people's opinions and I'm always keen to gain some knowledge and skills from my fellow colleagues. I have excellent problem-solving skills and I always feel great whenever I solve a problem successfully and that's why I've always believed that I belonged in the IT field. I enjoy reading books about woman's empowerment and gender equality. Three of my favourite books are "Know My Name by Chanel Miller", "Becoming by Michelle Obama" and, "A Thousand Sisters by Lisa J Shannon". As a Computer Science second- year female student, I need to be able to look back at my day and feel I have made a difference in society.
